

Notes & Comments for CMMS System (name of software will be **SyncShield**)

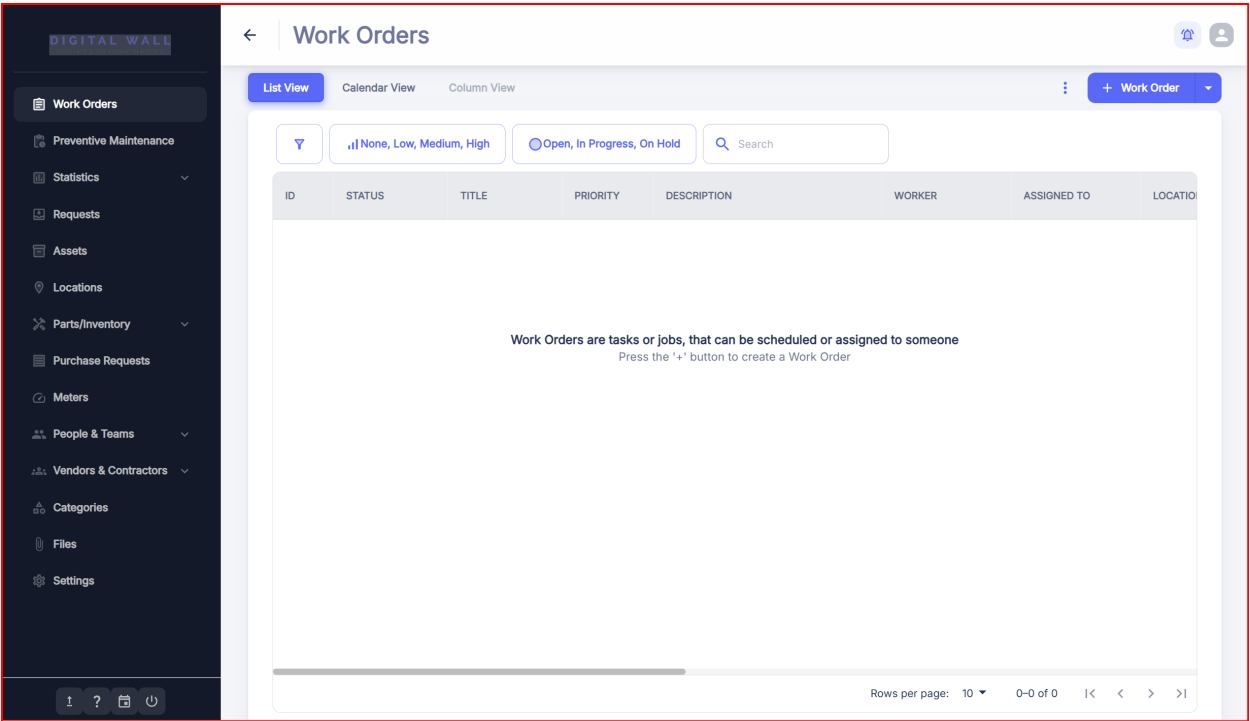

1- Logo , name Alignment for the Sign in Page

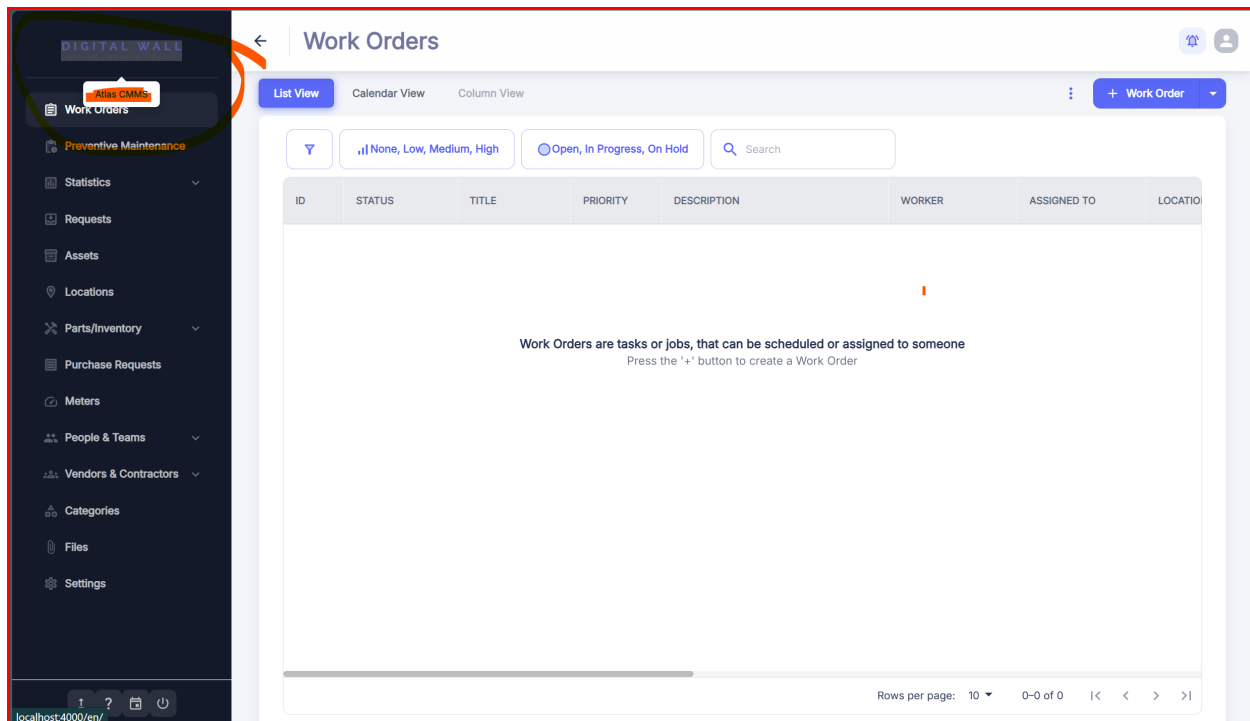

- 2- Logo , name alignment for Sign up page , also when I make Sign up , there is no activation from Manager of the Software or something , or even to email sent to the email for activation purposes , it immediately allowed me to login to the system , which is wrong and not secured at all.

The screenshot shows a web browser window with the address bar displaying 'Not secure 46.101.134.231/account/register'. The browser's tab bar shows several open tabs, including 'Cold Aisle Contain...', 'Everexceed Standb...', '4K Video Wall cont...', 'Polotno Studio - M...', 'Templatemaker', 'FIRE FIGHTING AU...', 'Online Data Centre...', 'Dell Technologies [...]', and 'Other favorites'. The main content area is split into two sections. On the left, a dark blue sidebar contains the text 'The perfect tool for Maintenance teams' at the top, followed by a circular logo with the letters 'DW' inside. Below the logo is the text 'Work Request System' and 'Never lose Work again.' at the bottom. A large, hand-drawn purple arrow points from the 'DW' logo towards the registration form on the right. The right section is a white card titled 'Create account' with the subtitle 'Fill in the fields below to sign up for an account.' It contains several input fields: 'First Name' (with a red error message 'The first name field is required'), 'Last Name' (with a red error message 'The last name field is required'), 'Email address', 'Phone', 'Password' (with an eye icon for toggling visibility), and 'Company Name'. Below these fields is a blue button labeled 'Create your account'. At the bottom of the card, there is a link 'I accept the terms and conditions.' and another link 'Already have an account? Sign in here'.

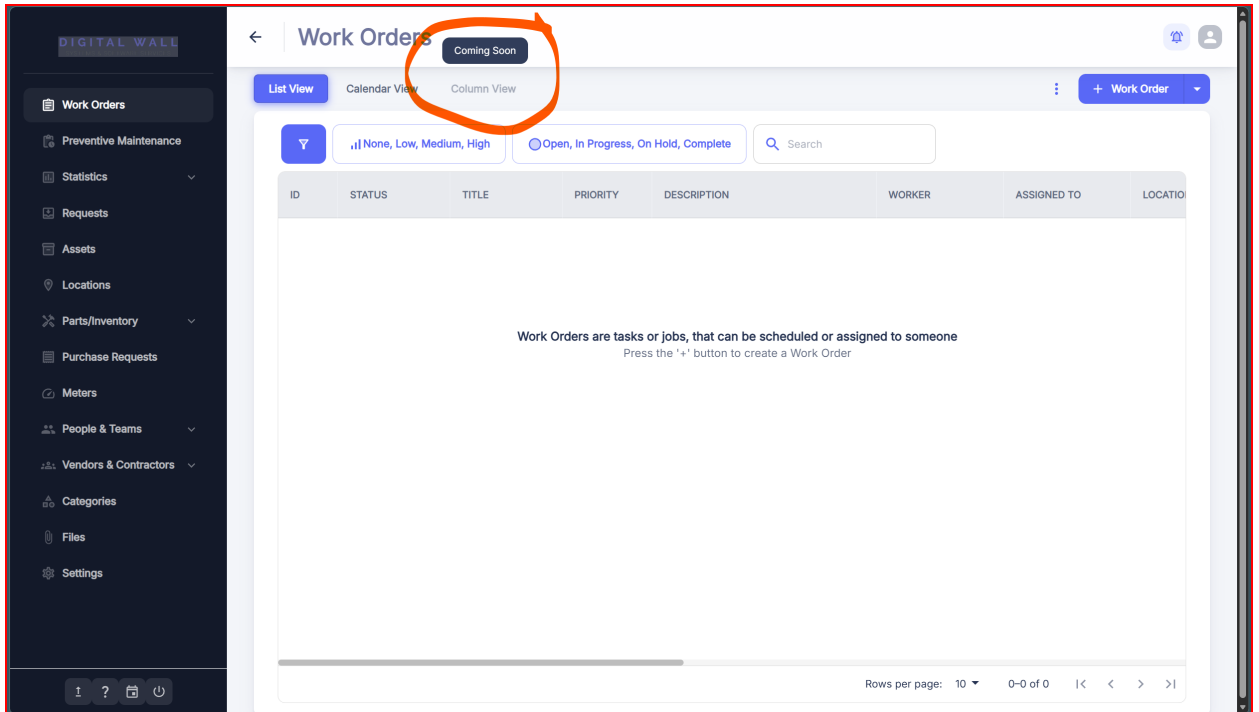

3- Logo , name fix , alignment for the Dashboard page

- 4- When I point to the Logo , its saying Atlas CMMS , please fix this as well, also when click on the logo , it takes me to website (rubbish)

5- Please remove this tab saying coming soon for the Column view page inside work orders

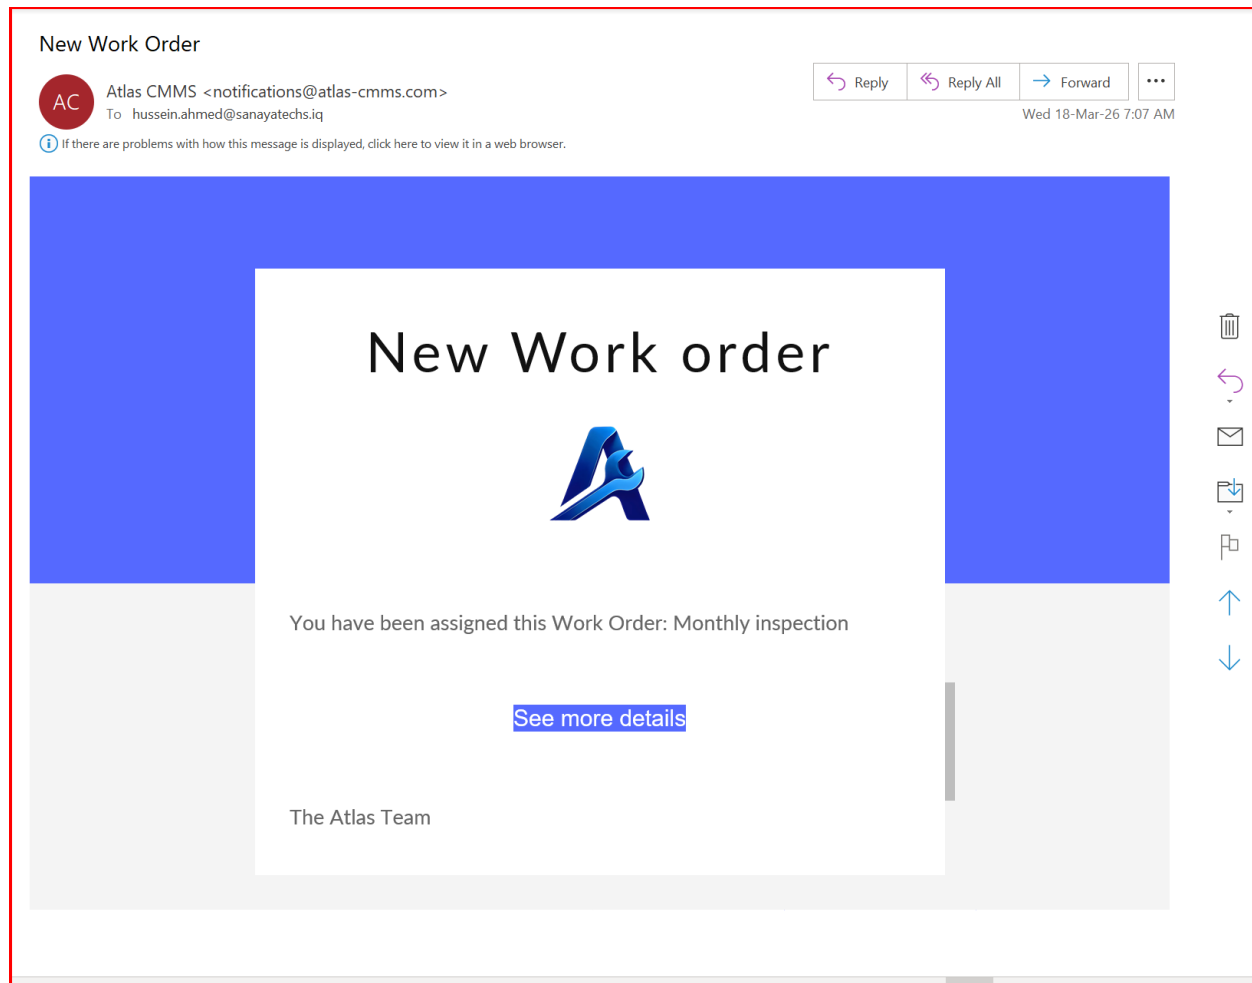

- 6- Currently, when creating a Work Order, if a required entry (e.g., Category, Primary Worker, or Contractor) does not exist, the user must cancel the current form, navigate to a different settings module to add the data, and then restart the Work Order creation process.

I would like to request an "Add/Create New" option directly within these dropdown menus. If a user cannot find the specific data they need, they should be able to click a button (e.g., a "+" icon or a "Create New..." link) within the same window to add the missing information without losing their current progress on the Work Order

The screenshot shows the 'Add Work Order' form in a CMMS application. The form is titled 'Add Work Order' and includes instructions: 'Fill in the fields below to create and add a new Work Order'. Fields include: Date (04/02/2026 00:00), Expected start date (04/02/2026 01:00), Estimated Duration in Hours (6), Priority (High), Category (dropdown), Primary Worker (dropdown), Additional Workers (dropdown), Contractors (dropdown with 'Contractors' selected and 'No options' below it), Location (searchable), and Asset (searchable). An orange circle highlights the 'Contractors' dropdown menu. The left sidebar shows navigation options like Work Orders, Preventive Maintenance, Statistics, Requests, Assets, Locations, Parts/Inventory, Purchase Requests, Motors, People & Teams, Vendors & Contractors, Categories, Files, and Settings. The right sidebar shows 'ASSIGNED TO' and 'LOCATION' sections.

- 7- When I created a word order , the system should send email to whom Work order created to notify him that you have new work order , eg. I created a work order for baqer or yousif , or you , the system should send you email based on (your registered account in CMMS) and send you that your work order is created, I will attach Example

The email should come just like photo attached above , New Work order , you have been assigned this work order : bla bla bla , then (click for more details or See more details , the system should take him to the CMMS system so he can view his Work order , and also at the footer it should appear the software name (**SyncShield**) with its logo , “ **SyncShield Maintenance team.**

- 8- Remove the timer I don't use it, remove the labour Time , Rate (we don't make Rate based on time or hours , we make payment for labour per day , so please change the Unit rate for labors from Hours to Daily , weekly , monthly , annualy)

On Hold ▾

Run Timer - 0:00

Labors

No labor costs have been added yet. They'll show up here when a user logs time and has an hourly rate stored in Atlas.

Add Time

Additional Costs

No Additional costs have been added yet

Add additional Cost

Parts

Add Time

Fill in the fields below to create and add Time

Assigned To

Hourly Rate

☒

Include this time in the total time
This will add the duration to the total time spent on the Work Order

Work Started At:

mm/dd/yyyy hh:mm

Category

Duration

Hours *

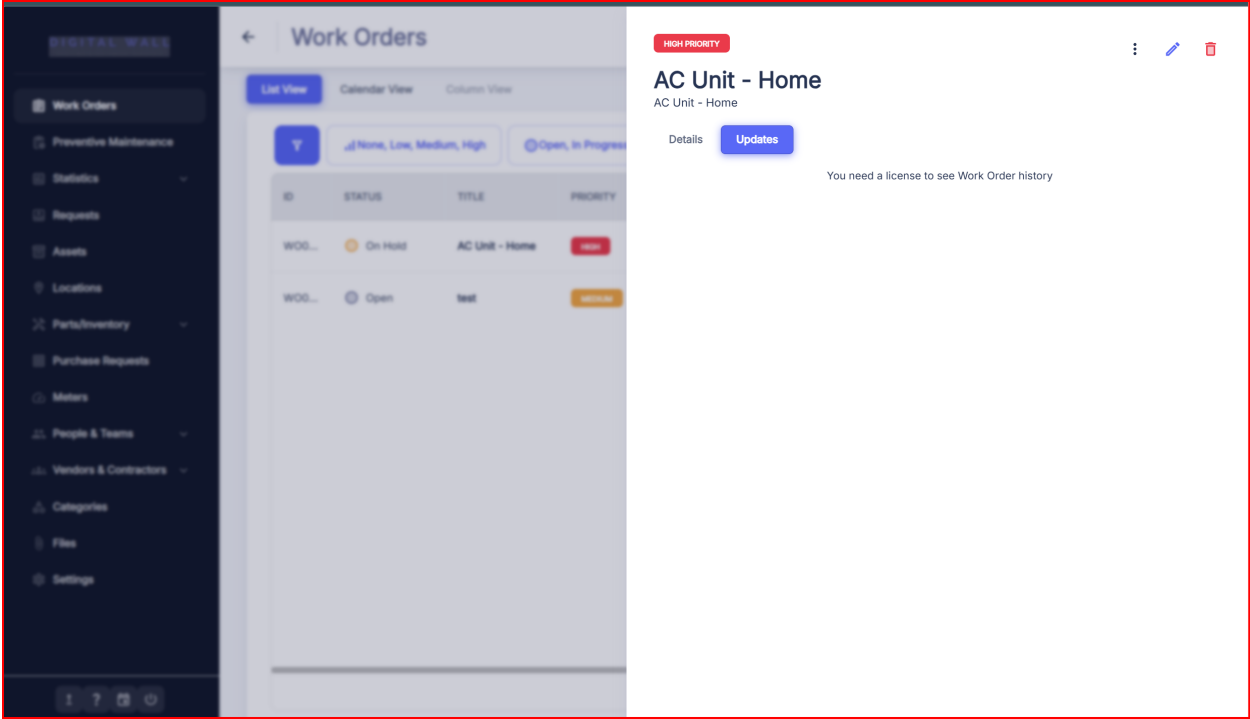

Minutes *

Add

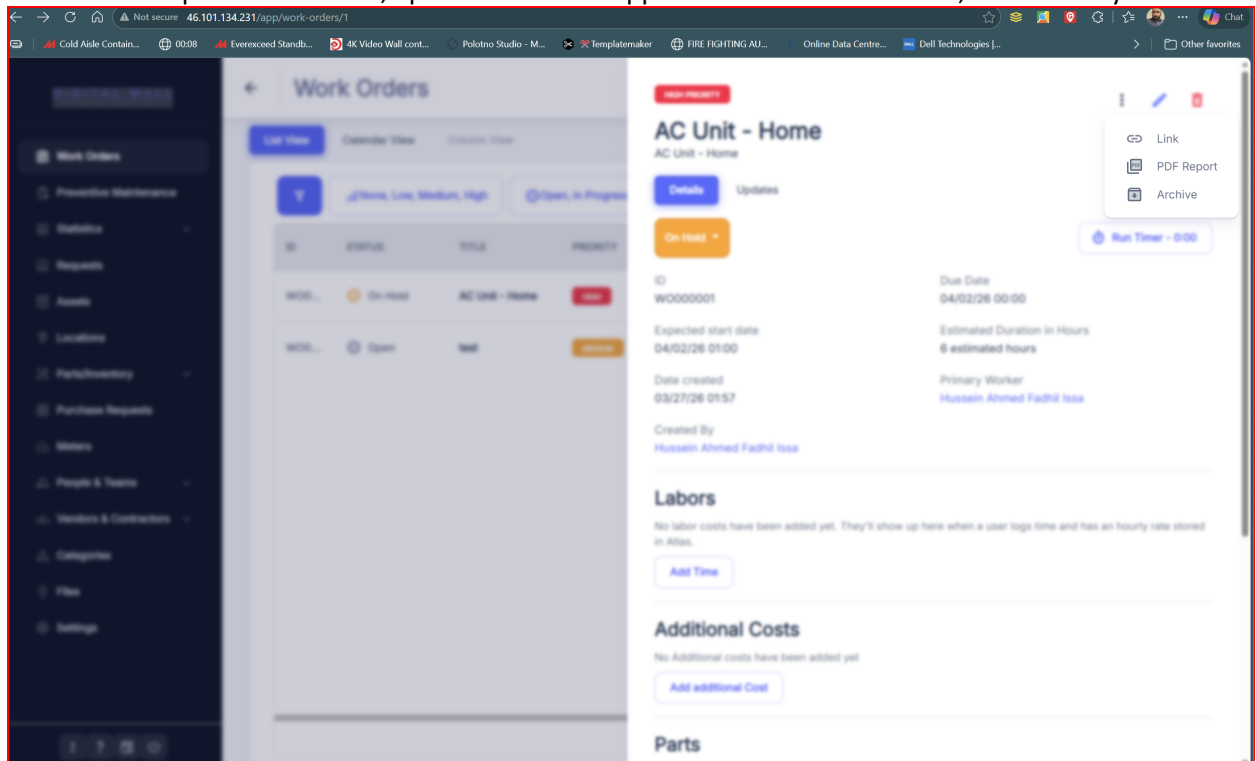

The Add time button , should align with Rates of (Daily , weekly , Monthly , Annualy) so no hour rate , it will be :

- Assigned to (ok)
- Hourly rate (not hour , but a selection either day , week , month , year)
- Include in total time (remove it)
- Work started (start Date , without hours)
- Category (ok)
- Duration (not hours , minutes but days, week , month ,year).

9- When I click on updates , it say a license is needed to see work order history , please fix this

10- Work order Report Generation , I prefer it should support Word Document also , not PDF only

11- When I click on PDF report , the work order appears in this way , please refer to the Work document I will provide you , we need the Work order to be designed in that way , also put the new software name (**SyncShield**) , also the Generated File name of PDF , Word Document of Work Order should be named As follows (SyncShield_WO###) based on Work Order Number created in system.

Status: On Hold

Priority: High

Work Order

AC Unit - Home

AC Unit - Home

Details:

Estimated Duration: 6.0

Signature:

Date:

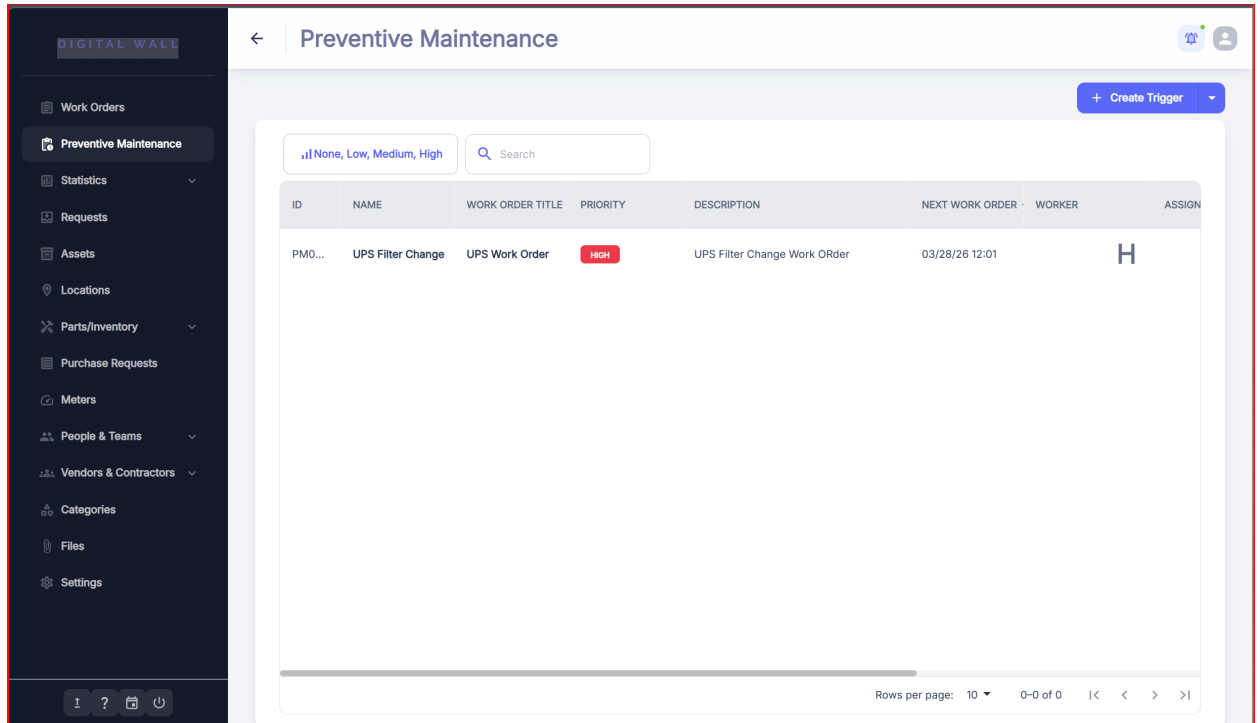

This Work Order was created with

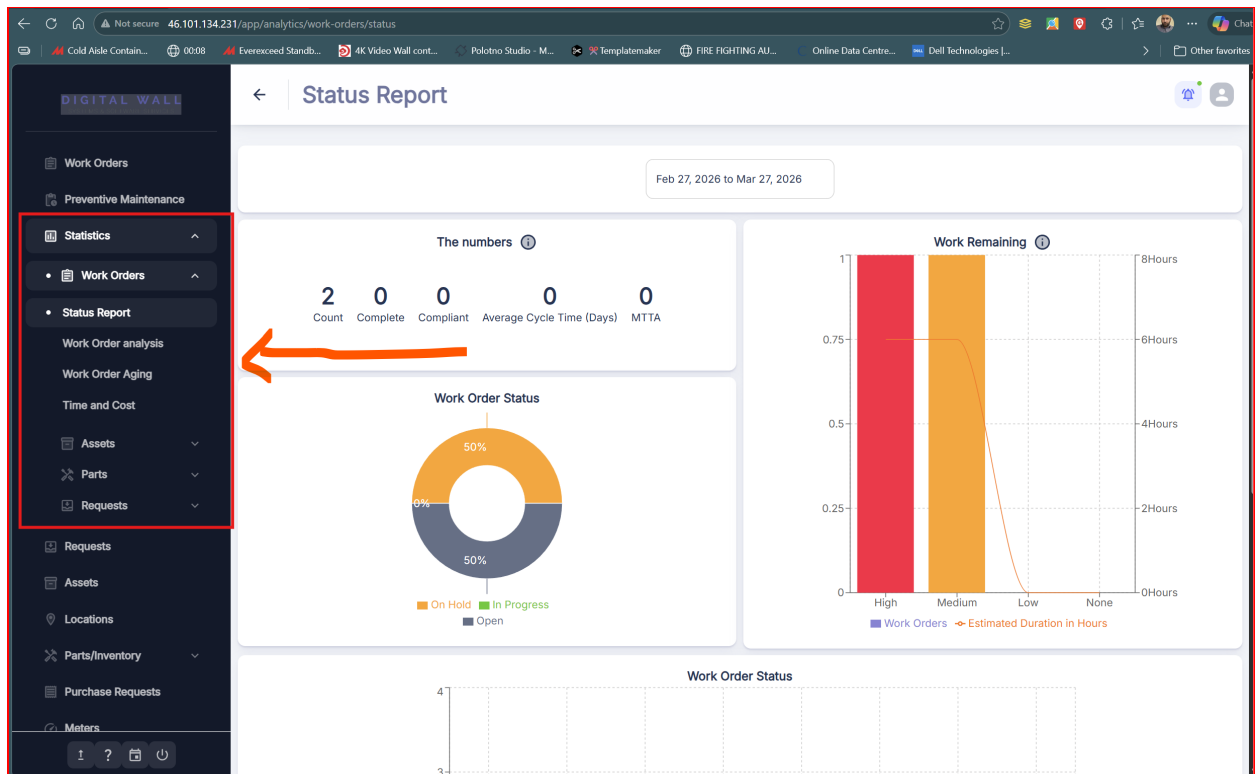

12- Preventive Maintenance tab :

When create preventive maintenance , also consider point 6 above , creating an immediate option during drop down list. , also send the trigger to the

Also there is no Generate PDF report for Preventive maintenance , or export to Excel as well , please add it , (use the template of Work order to generate the Preventive maintenance Matrix

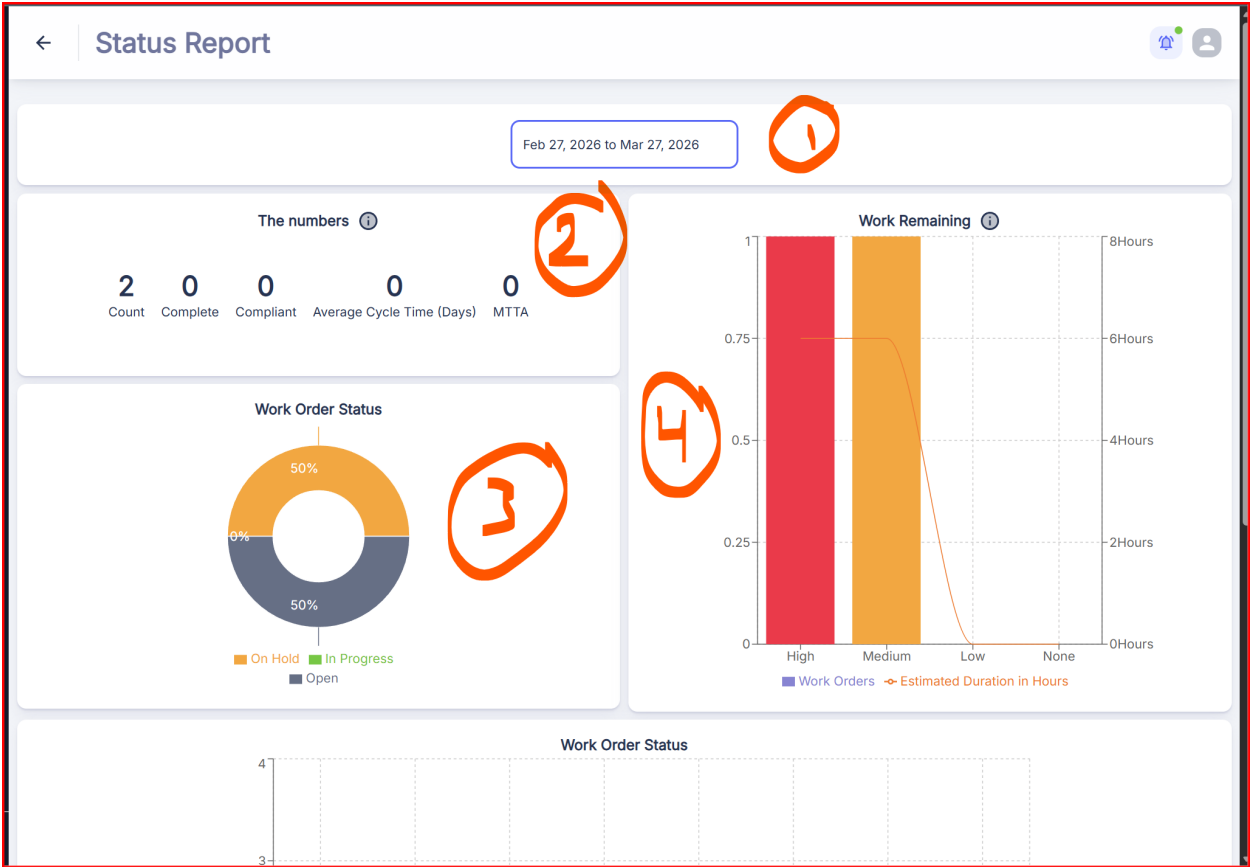

13- System Statistics : please change it and rename it to (reports) please find below image

- Status Report (I need it)
- Work Order analysis (I don't need it , you can remove it)
- Work order aging (I don't need it , you can remove it)
- Time and Cost (I need only Cost , I don't need time , maybe dates is ok , but not time)

Status reports :

The Date (number one 1) is good and nice I need it , it allows me to choose the date so I can view the status report , but make the button nice , it takes all way the row of the page , you can make it better (align it better way)

The numbers & Counting (Number two 2) is good and nice , it allows me to View the number of Counts , completed , remove the compliant , remove the average cycle time (days) and remove MTTA and replace with (Count , Complete , on Hold , on Progress , Canceled) so I can have better view to what is completed ,what is on progress , what's canceled , and when I click each it sends me immediately to the proper page.

Number 3 (Work Order Status) , you can remove it , because I already requested it above (number 2)

Number 4 (you can remove it , because I already requested It above) (number 2)

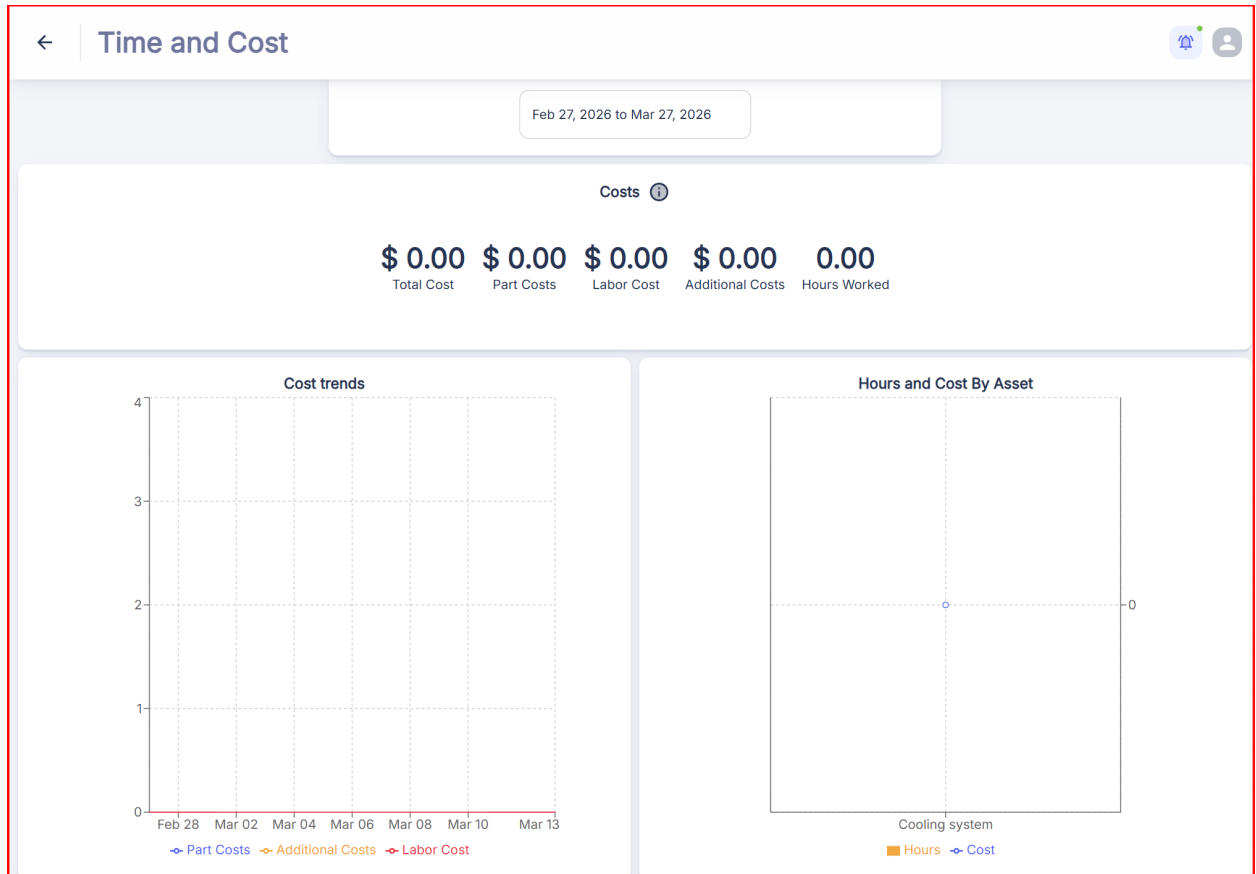

Number 5 (you can remove it , because I already requested it above (number 2)

Make all necessary changes , so it looks better , the Donuts bars , poll bars , etc.. but make it nice

- **Please add export , I need to export that Report Status , not just viewing it in the website ,**

14- Time and Cost

Kindly remove anything related to time , (name it Cost Report)

The Date Selection (is good) but as I mentioned in point 13 , make it better its taking all way the Row of page

Total Cost (is good , I need it)

Parts Cost (is good , I need it)

Labor Cost (is good I need it , but change from hourly counting rates , to day , week , month , year , in configuration as I mentioned previously ,

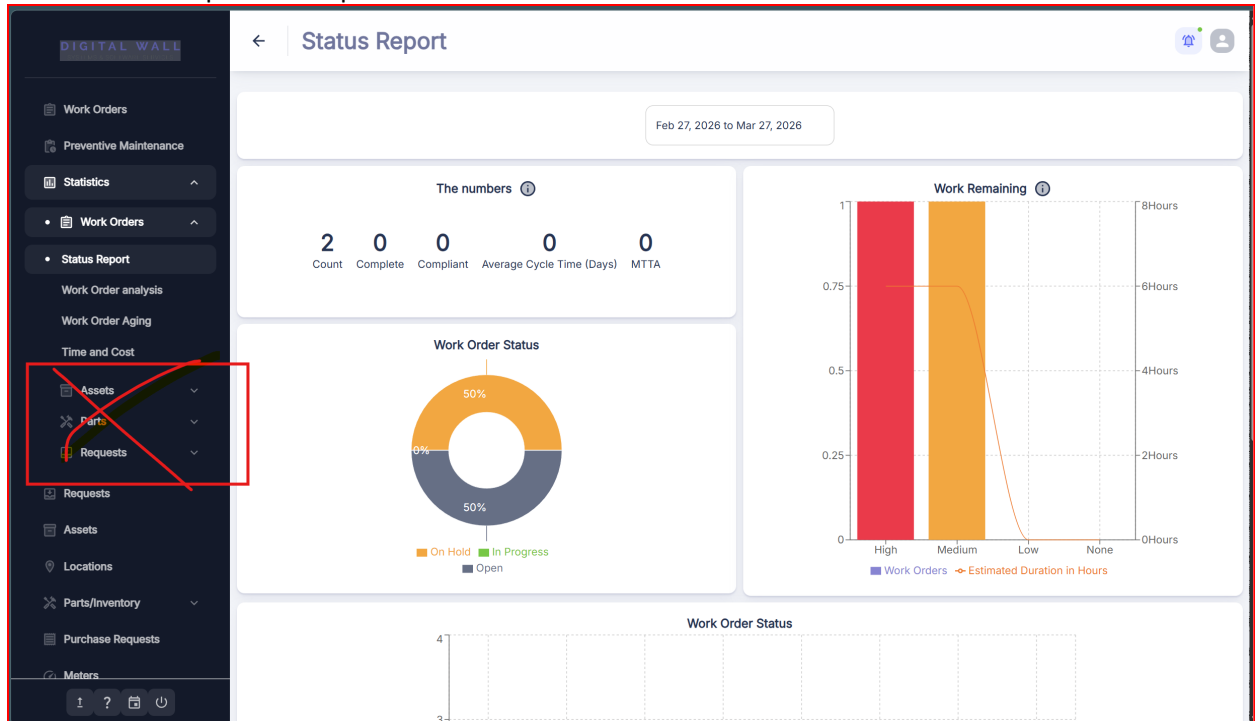

Additional Cost (good , I need it)

Hours Worked (remove it) I don't want it

The Cost Trend Poll Chart , and Hours and Cost by Asset Poll Chart change it to align the above parameters of Cost (make it donuts or even keep it but make it align to what changes I requested.

- **Please add export , I need to export that Cost Report , not just viewing it in the website ,**

15- Remove these options in reports I don't need it

16- The Requests : The Request feature is for users who do not have the authority to create a "Work Order" directly. Think of it as an "Inbox" for maintenance.

Who uses it: Office staff, machine operators, or tenants.

What it does: It allows someone to report a problem (e.g., "The AC is leaking" or "Server Rack 4 is overheating") without needing to know technical details or scheduling.
